

Project Proposal

E-COMMERCE WEBSITE DEVELOPMENT PROPOSAL

1. Proposal Title

E-Commerce Website Development Proposal for ABC Retail Technologies

2. Client Information

Client Name: Arun Kumar

Company: ABC Retail Technologies

Business Type: Online retail business (E-commerce)

3. Project Overview

Development of a modern and responsive e-commerce platform designed to improve the online shopping experience for ABC Retail Technologies.

4. Understanding of Requirements

ABC Retail Technologies currently operates an online retail business facing several operational challenges. The existing e-commerce website is outdated and slow, customers experience issues while making payments, and the team currently manages orders manually. To address these pain points, the company requires a modern, responsive e-commerce website delivered within approximately six weeks.

5. Proposed Solution

We propose to design and develop a robust, modern, and responsive e-commerce platform that streamlines the online shopping experience, resolves payment processing difficulties, and automates manual order management through a centralized admin dashboard.

6. Scope of Work

- Responsive e-commerce website
- Product catalogue
- Customer registration and authentication
- Shopping cart
- Secure payment gateway integration
- Order management
- Admin dashboard

7. Key Features

- Product catalogue
- Customer registration and login
- Shopping cart

- Secure payment gateway integration
- Admin dashboard to manage products and orders

8. Deliverables

- Fully functional website
- Admin panel
- Payment integration
- Testing and deployment

9. Project Timeline

Approximately six weeks

10. Budget

Client Budget: Around ■2,00,000

11. Assumptions

To be finalized

12. Next Steps

To be finalized
